

# Welcome

to UltraMarine

Greetings to you, UltraMarine reader!

As ever with a Christmas issue just after the Aqua trade show, it took a lot

of effort to put this one together in time for a tight deadline. My desk was literally stacked high with brochures and business cards for weeks after the show and these proved invaluable in helping me remember the mass of information that was thrown at me on the day! I have to say that many of the products on show this year looked particularly good, and thoughts of how they could be put to use to the benefit of my reef (or even to create an entirely new system) definitely rekindled my interest. I hope you enjoy the report and get similar inspiration! Obviously we've got a lot more besides techy news though, and some of the highlights this issue for me personally include Mike Paletta's piece on Reef Feeding, and James Fatherree's look at Reef Lighting. To be true, these are both rather illuminating pieces, created by leading experts in the field, that should be of particular use and interest to hobbyists both beginner and advanced. Anyway, best wishes for the holiday season from both myself, and the team at Research Information... enjoy, and we'll see you in 2020!

John

## 05 Marine News/Product News

### 12 Q&A

Blue Planet Aquarium Curator Dave Wolfenden answers your marine queries.

### 16 AQUA 2019 - Show Report

Mid-October saw reef trade representatives assemble en masse in Telford, UK with their finest new offerings. As ever, we were there to sort the wheat from the chaff with our definitive 12 page special report.

### 26 Feed the Reef

Mike Paletta brings his considerable experience to bear to guide you through the sometimes inexact science of providing a healthy diet for your reef residents.

### 36 Mucky Secrets

Chris Sergeant gets down and dirty with a variety of strange sea life as he once again takes us on a fascinating adventure into a truly bizarre ecosystem.

### 46 Clowns of the Clean-up Crew

Campbell Robertson introduces a somewhat motley crew of mischievous misfits that nonetheless make for some of the most entertaining and useful of reef critters... the hermit crabs!

### 56 Reef Lighting: Too Much, or Too Little?

Be illuminated as James Fatherree relates his extensive experience and results of real word testing to show that not all reef organisms need massive amounts of light to thrive, indeed for some, it can even prove harmful.

### 62 Meet the Featherdusters

Bob Fenner helps us brush up on our understanding of these unique reef organisms with this complete pictorial guide to the family.

### 68 Reef Icons - No. 6

John Clipperton present another intimate portrait of a reef fish species that ticks all the boxes for captive suitability, and is not just the preserve of the rare fish collector.

### 78 Making the Introductions

Keith Moyle updates us on the latest acclimatisation techniques so you can give those precious new additions to your reef the very best possible start.
